Collection Protocol :

- Collect a venous blood sample in a heparinized tube (lithium heparin, green cap).
- Collect a minimum volume of 5 ml of blood. Gently homogenize the tube by slowly inverting it to avoid hemolysis.
- Centrifuge the blood promptly after collection (ideally within 30 minutes) if possible; otherwise, send the heparinized tube, kept refrigerated (+4°C).
- Prepare a separate order form for each sample and send it in a sealed freezer bag, then place the bag inside a padded envelope.
- If multiple order forms are required, send a single check for all items.
- Laboratory address : **Laboratoire IODOLAB 3 Rte des pierres blanches, 69290 Grézieu la Varenne**

Analysis Agreement and Privacy Policy :

By signing, I agree that Iodolab laboratory may perform the requested analysis, which I will send by mail at my expense.
By signing, I consent to Iodolab storing the information written on this order form according to the terms described on the back of this page.
An invoice for the analysis performed will be sent to me.
